

# **ABSTRACT**

A Bank Management System is a software application that helps automate the day-to-day operations of a bank. It is designed to simplify and streamline the processes involved in banking operations, such as account management, transaction processing, and record-keeping. The system allows customers to perform various banking transactions online, including depositing and withdrawing money, paying bills, and transferring funds. It also enables bank employees to manage customer accounts, process transactions, and generate reports. Overall, a Bank Management System helps improve the efficiency and accuracy of banking operations while providing customers with a convenient and secure banking experience. The adoption of Electronic Banking by commercial enterprises has been in existence since the mid 90s, much greater in number due to lower operating costs associated with it. Electronic banking has initially been in the form of automatic teller machines and telephone transactions. More recently, it has been transfer made by the Internet, a new delivery channel for banking services that benefits both customers and banks. Internet banking system services can include: Open an account, Balance enquiry, Request for Cheque book, Beneficiary payments (EFT), Viewing monthly. Furthermore, customer's application for electronic banking facilities is expanding as the cost savings on transactions over the Internet are significant.

# ACKNOWLEDGEMENT

I am happy to present this Mini project after completing it successfully. This project would not have been possible without the guidance, assistance and suggestions of many individuals. I would like to express my deep sense of gratitude and indebtedness to each and every one who has helped me to make this project a success.

I heartily thank our **Principal, Dr. Sanjay H A, BMS Institute of Technology & Management** for his constant encouragement and inspiration in taking up this Mini project.

I heartily thank our **Head of the Department, Dr. Thippeswamy G, Dept. of Computer Science and Engineering, BMS Institute of Technology & Management** for his constant encouragement and inspiration in taking up this Mini project.

I gracefully thank our Project guide, **Dr. Archana R A, Assistant Professor, Dept. of Computer Science and Engineering**, for her encouragement and advice throughout the course of the Project work.

I gracefully thank our Project guide, **Dr. Bhuvaneshwari C M, Professor, Dept. of Computer Science and Engineering**, for her encouragement and advice throughout the course of the Project work.

Special thanks to all the staff members of Computer Science Department for their help and kind co-operation.

Lastly, I thank my parents and friends for their encouragement and support given to me in order to finish this precious work.

By,

**Shreyas R (1BY21CS176)**
